constitutions, weak lungs or a tendency to Bronchial Troubles or Consumption should recognize the value of treatment during the Summer months, when Nature comes to the aid of the physician. Doctors have long recognized that one month's Treatment in Summer is worth two months' in the Winter.

The only difference in the way the \$3 rate is given this Summer and the way it has been given before is that this time it is given only in the first month of Summer. People who want to take advantage of it understand very well now that if they begin during June they will be entitled to the whole Summer at the \$3 rate. So it will be enough to offer it DURING JUNE ONLY. The application must be made before \$ P. M., the closing hour of the evening session, on June 30th. Under no circumstances will the opportunity be given to any one after June 30th. The uniform rate of \$10 a month—the rate upon which this practice was founded 15 years agowill be resumed for regular office treatment (except to those patients who are by that time under our care) on and after July 1st. This notice is
